About Me

To obtain a position as a Front-End Developer where I can utilize my skills in UI/UX design and programming to create responsive and user-friendly websites and applications.

Skills

- Proficient in **HTML, CSS, JavaScript, jQuery ,React.js** and **Bootstrap**.
- Experienced in designing and developing responsive websites and applications.
- Strong understanding of **UI/UX design** principles and best practices.
- Ability to work independently and as part of a team.
- I have a foundational knowledge of **software testing**
- Excellent problem-solving and communication skills.

Professional Experience

website Design

Technology used: HTML | CSS | BOOTSTRAP
- Developed HTML and CSS templates, along with customized style sheets for specific design elements.
- Developed responsive designs using Bootstrap to ensure consistent appearance on multiple devices.

Ecommerce website -React.JS

Technology used: REACT | REACTBOOTSTRAP
- Implemented features such as a shopping cart, product listings, and a checkout process using React.js.
- Leveraged third-party libraries such as React Router and Redux to improve the functionality of the eCommerce website.
- Built the website with a mobile-first approach, ensuring a responsive design and seamless experience across devices.
